The amount was subsequently reduced by the Supreme Court of the State to \$15,000, and the case then taken to the Court of Appeals by the company.

Wichita, Kan., October 26.—News has been received here of a deplorable accident on the Cherokee strip yesterday. BAY CORRESPONDENCE.

Bob Davis does a Little Blue-dating.

ED. APPEAL.—Having a little spare time, I will give your readers a slight insight into journalism and other things in San Francisco as I have found them, and incidentally touch upon matters relating to the Mid-Winter Fair which is the all absorbing topic at this writing. While the Mid-Winter Fair is absorbing attraction now it is calculated to absorb all your salary later on.

I think, as an absorbent the Mid-Winter Fair will rank second only to its Chicago daddy.

Just at this stage of the game, journalism is at a low ebb in this city, and while modesty and a disposition to be retiring and lowly was always a cardinal virtue with me, still I am constrained to remark that were it not for a manifest willingness on the part the leading publishers in San Francisco to recognize bubbling genius, I don't know but what I would have to fall back on my trade as an antimony juggler. Often do I long for the good old days on the APPEAL when every production of my ready pencil was marked "M. G.," must go.

However I am eating several meals per day, with a maximum and minimum which may be expressed by the figures 3 and 5 or thereabouts. This don't include light lunches.

You can tell Abe Cohn that I am getting uncomfortably fat, weighing in the neighborhood of 220, and my John Wamamaker clothes are rapidly becoming subjects for the Misslet Clothing Parlors.

The anti credit system which prevails in this city, while inconvenient at times, has a tendency to prevent one's getting much in debt. This is a consoling thought to me.

I am interested in several little schemes, wherein I expect to gull the public at the Fair, and if any one of them pans out I will land forcibly on both feet.

The only capital required, (thank God) is nerve, commonly called gall, of which I expect to make a large and attractive display at our Western exposition. I am rapidly making myself solid with the Board of Trade, Aldermen, Police Department, several theater managers, have a growing free pass route, and after taking a Hammam this afternoon, will solidify myself with the Board of Health.

I am negotiating for the rent of a broadcloth coat with clothes-pin rear appendage, and will "do" society next week, being strictly in it with the elite of this Western metropolis, though I will stave off the local 400 as long as possible without having it appear that I am disposed to be proud and upish.

BOB DAVIS.

Beautiful Nights.

These bright moonlight nights are simply delightful. At about 5:30 p. m. the moon makes her appearance, and as it slowly rises looks like a huge electric arc surrounded by a golden globe; the soft light is filtered through the scant foliage and the long shadows streak across the lawns covered with dead leaves, which will continue to drop until the last sad reminder of a departed glory will have taken its place among its fallen fellows. Higher, with an imperceptible movement, goes the moon, the shadows grow shorter, that queen of the stars, that orb whose borrowed brightness makes night seem but a ghost of departed day, dispenses a weird light; a gentle zephyr toys with the crisp leaves, whose low rustle seems a faint protest at being disturbed.

Then night's dark sun looks down from the zenith, like a master viewing his work; seems to smile with satisfaction and slowly sinks to rest; the shadows lengthen, the moon disappears behind the Western hills, and the stars lend their weak glow, till their light is overthrown by the king of all the planets, heralded by a ruddy glow in the East which is the signal for songs of welcome from a thousand melodious throats; the sleepy world awakes and day begins.

Symptoms of Leprosy.

Some of the horrors of cigarette smoking have recently come to light in California. Boys of tender age, in some cases, have pronounced symptoms of leprosy, said to have been produced by smoking cigarettes manufactured by leprosy Chinese. Can anything be more horrible? The seed thus sown in the system of a healthy boy is liable to grow and develop until the body is eaten away inch by inch, and become at manhood a reeking mass of corruption. Surely tobacco in any form is poison, but in the form of cigarettes it is ten-fold worse. Cigarettes should be prohibited to all boys of tender age.

They Need It.

The people who need more religion are: The man who lets his horse stand all day in the rain without a blanket; the man who growls like a beast with a sore head when his wife asks him for money; the woman who whispers around that some other is not just what she ought to be; the preacher who is always looking for an easier place and a higher salary; the man who walks the streets with his hands in his pockets while his wife carries the baby, and the man who keeps a dog and says he can't afford a home newspaper.—Ex.
